REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The Lupfer patent as discussed in the 13 January 2009 Office action discloses all the limitations of the amended independent claims except "an axial length of the tube structure shortens during the intake stroke and increases during the exhaust stroke". The art of vacuum cleaners discloses the technique of maintaining the dirt bag taut while it is filled and the axial length shortens as evidenced by Saunders et al (US Patent 5,223,010 A), Schaefer et al (US Patent 4,240,812 A) and Stringer et al (US Patent 1,514,875 A). Figure 1 of Stringer et al shows a bag (3) that is held taut by spring (5) as the axial length of the bag shortens during intake, Figure 2 of Schaefer et al and Figure 4 of Saunders et al discloses the same teaching. However, none of these references are combinable with the Lupfer patent. Further, modifying the tube structure of Lupfer so its axial length **SHORTENS** during the intake stroke would not be obvious to one of ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
